BrightPath Tech

Lean scope. Fast launch. Lowest initial commitment.

01 / Executive summary

Response to the same fictional procurement request: implement a customer-service platform for 250 agents, integrate CRM and ERP, migrate two million records, and provide secure operations and support for three years. The buyer seeks clear delivery, commercial and service commitments. All organizations, projects, assurance documents and references in this proposal are invented.

Understanding the requirement

The buyer needs a single view of service requests, reliable exchange with sales and finance systems, measurable migration acceptance and auditable access to customer information. The proposed scope and its limitations are set out below.

Proposed solution

A hosted web application will provide ticket queues, email ingestion and a standard CRM connector; ERP integration uses a nightly CSV export. The platform targets 150 concurrent users at launch. The proposal does not include a load-test report or offline processing design. A single application instance serves the pilot. The buyer must supply a clean ERP export format, and changes to its format are billable. A public API is planned but not committed in the first release.

Submitted: 2026-10-18 | Procurement reference: TRAINING-RFP-026

02 / Delivery & commercials

Implementation and milestones

The proposed eight-week schedule allocates one week to discovery, four to configuration, two to testing and one to launch. The team consists of one project lead, two full-stack developers and a part-time tester. Buyer feedback is required within one business day. There is no explicit migration reconciliation threshold or contingency allocation. User training consists of two remote sessions. A slip in buyer decisions moves the go-live date.

Commercial offer

Three-year total cost is USD 156,000, including a fixed implementation fee and three annual subscriptions.

Cost item	USD	Basis
Implementation	$45,000	One time
Subscription	$35,000	Each year x 3
Migration	$6,000	One time
Training	$0	Two sessions included
3-year total	$156,000	Excludes taxes

Assumptions and exclusions

Includes 150 named users and one standard connector. Each additional user costs USD 12 per month. Historical data cleansing is the buyer's responsibility. ERP CSV scripting is included; a real-time ERP connector is excluded. Travel, taxes and bespoke reporting are excluded. Subscription prices are fixed for the initial three-year term.

03 / Assurance & service

Security and compliance

The application uses HTTPS and daily backups; access is controlled by passwords and administrator-managed user roles. No formal certification, penetration-test report, SSO commitment or audit retention period is supplied. Backup storage location and restoration time remain to be agreed. BrightPath states that a data processing agreement can be negotiated after selection. The proposal does not specify breach notification time or regional hosting boundaries.

Support, experience and references

Support is provided on business days from 09:00 to 17:00, with a one-business-day response target. Two fictional small-business deployments are described, each with fewer than 50 users. The only fictional reference, Pine Retail, has not agreed to a reference call. Out-of-hours coverage is a separately priced option and no rate is provided. Product documentation and recorded training are included.

Risks and buyer dependencies

Buyer access to source systems, nominated subject-matter experts and timely test decisions are required. Claims in this proposal require verification before award. Security and compliance evidence is limited. Aggressive timeline has no explicit contingency. Limited experience at the requested scale.

Evidence limitations

This fictional proposal is not an independently verified audit or a real commercial offer. Supporting reference calls, assurance documents and contract terms are to be reviewed during due diligence. No real confidential supplier information is included.
