NexaWorks

Balanced value. Measurable delivery. Accountable support.

01 / Executive summary

Response to the same fictional procurement request: implement a customer-service platform for 250 agents, integrate CRM and ERP, migrate two million records, and provide secure operations and support for three years. The buyer seeks clear delivery, commercial and service commitments. All organizations, projects, assurance documents and references in this proposal are invented.

Understanding the requirement

The buyer needs a single view of service requests, reliable exchange with sales and finance systems, measurable migration acceptance and auditable access to customer information. The proposed scope and its limitations are set out below.

Proposed solution

The platform integrates CRM and ERP through versioned REST adapters with idempotent retries and a monitored dead-letter queue. A containerized service tier supports 500 concurrent agents; staging load tests are included at 1.5 times that volume. An adapter catalogue records field mappings and transformation owners. Data is partitioned by business unit, with an operational dashboard for failed messages. Offline mobile use is outside the base scope.

02 / Delivery & commercials

Implementation and milestones

The 12-week plan includes signed stage gates at weeks 2, 6, 9 and 12, with named owners, rollback rehearsal and a two-week contingency. A RACI assigns the delivery lead, architect, two integration engineers, two developers, QA engineer and buyer product owner. Gates cover design approval, tested integrations, migration reconciliation and business acceptance. Acceptance requires 99.5% reconciliation, zero open critical defects and 95% user-test completion. Two migration rehearsals, role-specific training and a four-week hypercare period are included.

Commercial offer

Three-year total cost is USD 288,000, including integration, training, hosting and four weeks of hypercare.

Cost item	USD	Basis
Implementation	$108,000	One time
Subscription	$52,000	Each year x 3
Migration	$16,000	One time
Training	$8,000	One time
3-year total	$288,000	Excludes taxes

Assumptions and exclusions

Includes 250 agents, CRM and ERP adapters, and two million migrated records. Annual subscription covers hosting and support. Prices are fixed for three years; future increases are capped at 5%. Bespoke mobile development and source-system remediation are excluded. Change requests require an agreed estimate and written buyer approval.

03 / Assurance & service

Security and compliance

Security includes SAML SSO, MFA for administrators, encryption at rest and in transit, and immutable audit logs retained for 180 days. The fictional assurance pack NW-2026 lists a penetration-test remediation summary; a full report is available under NDA in this training scenario. A regional hosting commitment, DPA, 24-hour breach notice and 30-day deletion process are proposed. Quarterly restoration exercises target RPO 4 hours and RTO 8 hours. No formal ISO certificate is supplied.

Support, experience and references

A dedicated service manager provides 24/7 critical support, a 15-minute response target and a four-hour workaround target. Seven comparable fictional projects include Oak Logistics (280 agents) and Meadow Services (240 agents), with reference calls offered during due diligence. Monthly reviews report uptime, backlog and incident trends. Named backup staff cover holidays, and a knowledge-transfer package is handed over before hypercare ends. Service credits apply to missed response targets.

Risks and buyer dependencies

Buyer access to source systems, nominated subject-matter experts and timely test decisions are required. Claims in this proposal require verification before award. Full independent assurance documents require due diligence. Offline mobile functionality is excluded.

Evidence limitations

This fictional proposal is not an independently verified audit or a real commercial offer. Supporting reference calls, assurance documents and contract terms are to be reviewed during due diligence. No real confidential supplier information is included.
