Orbit Digital

Established delivery history. Flexible integration scope.

01 / Executive summary

Response to the same fictional procurement request: implement a customer-service platform for 250 agents, integrate CRM and ERP, migrate two million records, and provide secure operations and support for three years. The buyer seeks clear delivery, commercial and service commitments. All organizations, projects, assurance documents and references in this proposal are invented.

Understanding the requirement

The buyer needs a single view of service requests, reliable exchange with sales and finance systems, measurable migration acceptance and auditable access to customer information. The proposed scope and its limitations are set out below.

Proposed solution

The proposal offers a configurable customer-service platform; CRM and ERP integration methods will be agreed during discovery. The platform supports queue management, dashboards and a searchable knowledge base. The architecture diagram is described but not supplied. The proposal does not commit to API protocols, message retry semantics, migration mappings or concurrency targets. Orbit expects its integration partner to confirm feasibility after a paid discovery workshop.

02 / Delivery & commercials

Implementation and milestones

Delivery is planned over 14 weeks with discovery, configuration, migration, acceptance testing and a two-week hypercare period. A senior programme manager, solution consultant, two configuration specialists and one tester are allocated. Integration engineers are subject to discovery outcomes. Milestones occur at weeks 3, 7, 11 and 14; buyer sign-off is required at each. Acceptance criteria are to be negotiated. A risk register is reviewed weekly but schedule contingency is not quantified.

Commercial offer

The estimated three-year total is USD 312,000; custom integration changes are charged at USD 1,200 per consultant day.

Cost item	USD	Basis
Implementation	$120,000	One time estimate
Subscription	$58,000	Each year x 3
Migration	$12,000	One time estimate
Training	$6,000	One time
3-year total	$312,000	Before change requests

Assumptions and exclusions

Includes 250 agents and ten integration consulting days. Additional integration days require written approval. Hosting and business-hours service management are included; critical support is covered by the subscription. Taxes and on-site travel are excluded. No maximum integration overrun or renewal increase is committed.

03 / Assurance & service

Security and compliance

The service supports SSO, encrypted storage, quarterly access reviews and a 90-day audit trail. Orbit describes an annual external assessment, but no report identifier or certification is included. Backups are retained for 30 days and restoration is tested annually. RTO is one business day; RPO is 24 hours. A standard DPA is offered, with regional storage location to be agreed. Subprocessor details are available on request.

Support, experience and references

Orbit reports 18 comparable fictional deployments and offers 24/7 critical response within 30 minutes, with named escalation owners. Three fictional references are offered: Birch Manufacturing (450 agents), Elm Transport (310 agents) and Willow Care (290 agents). Each reference description states implementation dates and scope. Quarterly training, monthly reviews and a dedicated account lead are included. A four-hour workaround objective is stated for critical incidents.

Risks and buyer dependencies

Buyer access to source systems, nominated subject-matter experts and timely test decisions are required. Claims in this proposal require verification before award. Integration architecture and effort are unresolved. Commercial total may rise with discovery-driven changes. Security assurance documents and data region need confirmation.

Evidence limitations

This fictional proposal is not an independently verified audit or a real commercial offer. Supporting reference calls, assurance documents and contract terms are to be reviewed during due diligence. No real confidential supplier information is included.
